***Why a sale? Why now?**

(So glad you asked!)

These books, at their original price of \$12 each, have sold more slowly than we expected. Books don't last forever in inventory. (They turn yellow.) Our hope is that by lowering the price we'll be able to sell our current inventory while the books are still in good condition, because otherwise we may not be able to sell them at all. Also, FWS is working on getting out of debt and building a prudent reserve, and the proceeds from this sale will help us to achieve that goal.
